Subject: Supply of Syllabus of B.Sc Zoology (Hons) for Under Graduate Classes.

Sir /Madam,

I am sending herewith a complementary copy of new/revised syllabus of B.Sc Zoology(Hons) duly approved by the Board of Studies(UG) and faculty of Life Science in its meeting held on 14-11-2011 . Further Academic Council Vide item No -22 in its meeting held on 24-11-2011 approved the same which will be implemented in phased manner from the academic session 2012-2013 onwards.

Yours Faithfully,

Encls: As Above

Deputy Registrar (Acad)

PROCEEDINGS OF THE MEETING OF FACULTY OF LIFE SCIENCES

A meeting of the faculty of Life Sciences was held on 20th November 2019.

Dr. S. L. Kulkarni, Head of the Department of Life Sciences, informed the Board of Governors that the Department has submitted a proposal to the University Grants Commission (UGC) for the establishment of a new department of Zoology.

ANNEXURE-A

The following items were discussed and approved by the Board of Governors:

B.Sc. I (HONORS IN ZOOLOGY)

Course-I: Invertebrates-I:

Section-A:

Introduction to Non-Chordata = 04 hours

Protozoa = 22 hours

Porifera = 08 hours

Section-B:

Cnidaria = 18 hours

Ctenophora = 08 hours

Total = 60 hours

Course-II: Invertebrates-II:

Section-A:

Platyhelminthes = 12 hours

Nemathelminthes = 18 hours

Section-B:

Annelida = 30 hours

Total = 60 hours

Course-III: Invertebrates-III:

Section-A Arthropoda = 30 hours

Section-B Mollusca = 20 hours

Echinodermata = 10 hours

Total = 60 hours

Course-IV: HS-I: Cytogenetics and immunology:

Section-A = 30 hours

Section-B = 20 hours

Total = 60 hours

Total = 60 hours

B.Sc. II (HONORS IN ZOOLOGY)

Course-IV: Chordata-I:

Section-A = 10 hours

Section-B = 12 hours

Section-C = 19 hours

Section-D = 19 hours

Total = 60 hours

- 5 -

Course-V: Chordata-II:

Section-A	= 15 hours
Section-B	= 15 hours
Section-C	= 15 hours
Section-D	= 15 hours
Total	<u>= 60 hours</u>

Course-VI: General Zoology:

Section-A	Cell Biology	= 20 hours
Section-B	Developmental Biology	= 22 hours
Section-C	Evolution	= 18 hours
Total		<u>= 60 hours</u>

Course- HS-II: Molecular Biology and Biotechnology:

Section-A	= 20 hours
Section-B	= 22 hours
Section-C	= 18 hours
Total	<u>= 60 hours</u>

B.Sc. III (HONORS IN ZOOLOGY)

Course-VII: Biochemistry:

Section-A	= 32 hours
Section-B	= 28 hours
Total	<u>= 60 hours</u>

Course-VIII: Mammalian Physiology:

Section-A	= 34 hours
Section-B	= 26 hours
Total	<u>= 60 hours</u>

Course-IX: Applied Zoology and Environmental Biology:

Section-A	= 34 hours
Section-B	= 26 hours
Total	<u>= 60 hours</u>

Course- HS-III: Medical Zoology and Environment Management:

Section-A	= 34 hours
Section-B	= 26 hours
Total	<u>= 60 hours</u>

B.Sc (Hons Course) -Zoology.
Scheme of Examination

First Year Examination

Paper	Subject	Time	Total Marks	Internal Assessment (marks)	Pass Percentage
I	Invertebrates-I	3 hrs	40	10	40
II	Invertebrates-II	3 hrs	40	10	40
III	Invertebrates-III	3 hrs	40	10	40
HS-I	Cytogenetics & Immunology	3 hrs	40	10	40
Practical	Two Sessions	2½ hrs. each (5 hrs.)	50		
			210	40	

Second Year Examination

Paper	Subject	Time	Total Marks	Internal assessment (marks)	Pass Percentage
IV	Chordata-I	3 hrs	40	10	40
V	Chordata-II	3 hrs	40	10	40
VI	General Zoology	3 hrs	40	10	40
HS-II	Molecular Biology and Biotechnology	3 hrs	40	10	40
Practical	Two Sessions	2½ hrs. each (5 hrs.)	50		
			210	40	

Third Year Examination

Paper	Subject	Time	Total Marks	Internal assessment (marks)	Pass Percentage
VII	Biochemistry	3 hrs	40	10	40
VIII	Mammalian Physiology	3 hrs	40	10	40
IX	Applied Zoology and Environmental Biology	3 hrs	40	10	40
HS-III	Medical Zoology and Environment Management	3 hrs	40	10	40
Practical	Two Sessions	2½ hrs. each (5 hrs.)	50		
			210	40

B.Sc. (Hons) Zoology (First Year)

Paper: HS-I (Cytogenetics and Immunology)

M.M. : 40

Duration: 60 hrs

Note for examiners and students

- 1) Examiner will set Nine questions in all, selecting Four questions from each section of the syllabus, and one consisting of eight short questions will be set to cover the entire syllabus and that will be compulsory.
- 2) The candidates will be required to attempt five questions in all i.e. selecting atleast two question from each section.
- 3) All questions carry equal marks.
- 4) Pass percentage is 40% but to get hon's degree the aggregate percentage should be 50 percent.

SECTION-A CYTOGENETICS (30 hrs)

General Introduction and Mendelian Genetics

Mendel's experiments, Principle of segregation, Principle of Independent assortment

(6 hrs)

Interactions of genes

Linkage, Crossing over and Chromosome mapping:

Linkage and linkage groups, Complete and incomplete linkage, Cytological basis of crossing over, Construction of chromosomes maps

(6hrs)

Sex determination :

Chromosome theory of sex determination, Genetic Balance theory, Cytoplasmic sex determination

(4hrs)

Sex linked inheritance :

Sex linked inheritance in *Drosophila* and man, Sex limited and sex influenced genes

(3hrs)

Extrachromosomal inheritance

Criteria for cytoplasmic Inheritance, Examples of cytoplasmic Inheritance

(3hrs)

Mutations

Chromosomal Mutations: Deletion, Duplication, Inversion, Translocation, Aneuploidy and Polyploidy; Genemutations: Induced versus Spontaneous mutations, Back versus Suppressor mutations, Molecular basis of Mutations in relation to UV light and chemical mutagens, Detection of mutations: CLB method, Attached X method, DNA repair mechanisms.

(8hrs)

SECTION B- IMMUNOLOGY (30hrs)

Components of immune system

Innate, Adaptive (cell mediated and humoral) - Passive: Artificial and Natural Immunity, Active: Artificial and Natural Immunity.

(3hrs)

Cells and Organs of the Immune System

Haematopoesis and role of haematopoietic factors, Cells of the immune system, Organs of the Immune system:, Primary and Secondary lymphoid organs, Lymphatic system.

(4hrs)

Antigens

Antigenicity and immunogenicity, Immunogens, Adjuvants and Haptens, Factors influencing immunogenicity, B and T-cell epitopes.

(2hrs)

Immunoglobulins

Structure and Functions, Basic structure, deducing antibody structure, classes and function, Antigenic determinants on immunoglobulins, Antigen-antibody interactions, Polyclonal sera, Monoclonal antibodies, Hybridoma technology. (5 hrs)

Major Histocompatibility Complex

Structure, polymorphism and functions, MHC and immune responsiveness. (2 hrs)

Antigen Processing and Presentation

The cytosolic pathway: endogenous pathway and the endocytic pathway and exogenous pathway. (3 hrs)

Immune Effectors Mechanisms

Cytokines: properties and functions, general structure of cytokine receptors, Complement system: components, activation and functions. (4 hrs)

Hypersensitivity

Gell and Coombs classification, IgE mediated (type I), antibody mediated (type II), Immune complex mediated, (type III) and T- DTH mediated hypersensitivity (type IV). (4 hrs)

Immune System in Health & Disease

Vaccines: bacterial, viral, toxoid and III generation vaccines, Immunodeficiency, Autoimmunity. (3 hrs)

2. Delves, P. J., Martin, S. J., Burton, D. R., Roitt, I.M. (2006). XI Edition. Roitt's Essential Immunology

B.Sc. (Hons) Zoology (Second Year)

Paper: HS-II (Molecular biology and Biotechnology)

M.M. : 40

duration: 60 hrs

Note for examiners and students

- 1) Examiner will set Nine questions in all, selecting Four questions from each section of the syllabus, and one consisting of eight short questions will be set to cover the entire syllabus and that will be compulsory.
- 2) The candidates will be required to attempt five questions in all i.e. selecting atleast two question from each section.
- 3) All questions carry equal marks.
- 4) Pass percentage is 40% but to get hon's degree the aggregate percentage should be 50 percent.

SECTION – A MOLECULAR BIOLOGY (30 hrs)

Mechanism of Transcription

RNA Polymerase and the transcription unit, Transcription in Prokaryotes, Transcription in Eukaryotes (5hrs)

RNA Modifications

Split genes, concept of introns and exons, removal of Introns, spliceosome machinery, splicing pathways,alternative splicing, exon shuffling, RNA editing, and mRNA transport. (5hrs)

Translation

Assembly line of polypeptide synthesis - ribosome structure and assembly, various steps in protein synthesis., Charging of tRNA, aminoacyl tRNA synthetases. Proteins involved in initiation, elongation and termination of polypeptides. Fidelity of translation. Inhibitors of protein synthesis.Regulation of translation, Translation-dependent regulation of mRNA and Protein Stability. (8hrs)

Transcription Regulation in Prokaryotes

Principles of transcriptional regulation, regulation at initiation with examples from *lac* and *trp* operons (3hrs)

Transcription Regulation in Eukaryotes

Conserved mechanism of regulation, Eukaryotic activators, Signal integration, combinatorial control, transcriptional repressors, signal transduction and control of transcriptional regulator, Gene Silencing (5hrs)

Regulatory RNAs

Riboswitches, RNA interference, miRNA, siRNA, Regulatory RNA and X-inactivation. (4hrs)

SECTION B – BIOTECHNOLOGY (30 hrs)

Introduction

Concept and scope of biotechnology, Tools and techniques in biotechnology. (4hrs)

Animal Cell and Tissue Culture

Cell culture media (natural and defined), Preparation and sterilization, Primary cell culture, Cell lines, Pluripotentstem cells, Cryopreservation of cultures. (5hrs)

Molecular Techniques in Gene manipulation

Introduction to the concept of Recombinant DNA Technology, Cloning vectors, Restriction and modifying enzymes, Transformation techniques (microbial, plants and animals), Construction and screening of DNA libraries, Molecular analysis of DNA, RNA and Proteins (i.e.Southern, Northern and Western blotting), DNA sequencing (Maxam-Gilbert and Sanger methods),Polymerase chain reaction and DNA microarrays. (7hrs)

Transgenic Animal Technology

Production of transgenic animals-nuclear transplantation, Retroviral method, DNA microinjection method, Applications of transgenic mice, sheep, goat, pig, birds and fish, Dolly and Polly, Scientific significance,

Therapeutic applications, Human cloning, Ethical issues of transgenic animals.

(5hrs)

Applications of Biotechnology

Molecular diagnosis of genetic diseases (Cystic fibrosis, Huntington's disease, Sickle cell anemia). RFLP, RAPD and , Vaccines and therapeutic agents, Recombinant DNA in medicines (recombinant insulin and human growth hormone), Gene therapy, Enzymes in detergents and leatherindustries, Heterologous protein production, Bioremediation. (7hrs)

Patenting & Biosafety

Intellectual property rights, Biosafety levels and guidelines.

(2hrs)

SUGGESTED BOOKS (Molecular Biology)

B.Sc. (Hons) Zoology (Third Year)

Paper: HS-III (Medical Zoology and Environment Management)

M.M. : 40

duration: 60 hrs

Note for examiners and students

- 1) Examiner will set Nine questions in all, selecting Four questions from each section of the syllabus, and one consisting of eight short questions will be set to cover the entire syllabus and that will be compulsory.
- 2) The candidates will be required to attempt five questions in all i.e. selecting atleast two question from each section.
- 3) All questions carry equal marks.
- 4) Pass percentage is 40% but to get hon's degree the aggregate percentage should be 50 percent.

SECTION A- MEDICAL ZOOLOGY (30 hrs)

Reproductive Health

Implantation and placental physiology in pregnancy; placental secretions and their regulation; Health and Diseases during pregnancy.

Infertility in male and female: cause, diagnosis and management

Assisted Reproductive Technology, Sex selection, sperm banks, frozen embryos, in vitro fertilization, ET, IFT, IUT, ZIFT, GIFT, ICSI, PROST. Modern contraceptive technologies : Demographic terminology used in family planning. (12hrs)

Human Welfare

Bionomics and control of crop pests: *Earias vittella*, *Pectinophora gossypiella*, *Heliothis armigera*. Bionomics of the following stored grain pests and their management for control: *Coryza cephalonica*, *Trogoderma granarium*, *Callosobruchus chinensis*.

Insect control: Mechanical, cultural and biological.

Classification of insect control with reference to chlorinated hydrocarbons, organophosphates, carbamates and synthetic pyrethroid.

General aspects of Integrated Pest Management (IPM). (12hrs)

Fish Technology

Zebrafish as a model for biotechnology. Genetic improvements in aquaculture industry.

Induced breeding and transportation of fish seed. (6hrs)

SECTION - B ENVIRONMENT MANAGEMENT (30 hrs)

Introduction:

Man as a biological species in the ecosystem; population increase; carrying capacity, exploitation of resources due to activities like agriculture, horticulture, urbanization and industrialization. Role of Government, NGO's, International organizations, treaties and conventions. Environmental movements.

Definition; Brundtland Report; Threats to sustainable development, green technologies, eco-cities, Ecological footprint, National Environmental Policy. (14hrs)

Conservation of resources

Soil – Contour farming, afforestation and reforestation; Water – Rainwater harvesting, aquifers , groundwater recharge, watershed management; Biodiversity – In-situ conservation (Sanctuaries,

National Parks, Biosphere Reserves, World Heritage Sites), Project Tiger and other conservation efforts. Social forestry and Joint forestry Management; Ex-situ conservation (botanical gardens, gene banks, cryopreservation); Role of organizations like NBPGR, BSI, ZSI, WWF, IUCN and conventions like Convention on Biological diversity; Ramsar Convention, National Action Plan on Conservation of Biodiversity; Environmental laws and acts. (16hrs)
